INFORMATION DISCLOSURE STATEMENT

Sir:

The Examiner is respectfully requested to consider the references, copies enclosed, which may qualify as prior art. For the Examiner's convenience, the references are listed on the attached form prepared by Applicants; this form is generally based on Patent and Trademark Office form PTO/SB/08a, but is not a USPTO form. Pursuant to 37 C.F.R. 1.98(a)(2)(ii), copies of cited U.S. patents and U.S. patent application publications are not included, but will be provided upon request. Copies of seven foreign patent documents and seventy six non-patent literature documents are enclosed herewith. For the sake of convenience, however, electronic submission of the references is carried out in two separate EFS submissions.

European Patent EP 0317512 is primarily in German; however, an English abstract of the patent is provided. This patent discusses methods of proembryonic

cotton cell mass production in liquid suspensions and provides a general background description of one area of the field to which the current invention pertains.

This information is cited in a spirit of forthrightness and cooperation to enable the applicants to obtain that measure of protection for the invention to which there is entitlement. However, no representation is made that the listed art actually qualifies as prior art under the patent statute and the mere use of any accompanying form, whether such form is generated by Applicant or is a USPTO form, is not an admission that all listed references are prior art. No representation is made that applicants know of the best art.

It is believed that this submission does not require the payment of a fee. If this is not correct, please charge any required fee to deposit account no. 07-1969.

Respectfully submitted,

/michaelcurtis/
